

Security Report

Infection Monkey

Overview

✓ No critical security issues were detected.

⚠ To improve the monkey's detection rates, try adding users and passwords and enable the "Local network scan" config value under **Basic - Network**.

The first monkey run was started on 21/05/2026 12:52:25. After 0 minutes and 30 seconds, all monkeys finished propagation attempts.

The monkey started propagating from the following machines where it was manually installed:

- P11

The monkeys were run with the following configuration:

Username used for brute-forcing:

- Administrator
- root
- user
- pablo

Passwords used for brute-forcing:

- roo*****
- 123*****
- pas*****
- 123*****
- qwe*****
- 111*****
- ilo*****
- 123*****

The Monkey scans the following IPs:

- 192.168.1.41

Note: Monkeys were configured to avoid scanning of the local network.

Security Findings

Immediate Threats

During this simulated attack the Monkey uncovered 0 threats:

Potential Security Issues

The Monkey uncovered the following possible set of issues:

- Weak segmentation - Machines from different segments are able to communicate.

Machine related recommendations

- P11
 1. Segment your network and make sure there is no communication between machines from different segments.

The network can probably be segmented. A monkey instance on P11 in the networks could directly access the Monkey Island server in the networks

10.10.10.0/24	192.168.60.0/24	192.168.122.0/24	
172.20.0.0/24	172.17.0.0/16	172.19.0.0/16	172.21.0.0/16
172.22.0.0/16	172.18.0.0/16	192.168.1.0/24	.

The Network from the Monkey's Eyes

The Monkey discovered 1 machines and successfully breached 0 of them.

From the attacker's point of view, the network looks like this:

Legend: Exploit — | Scan — | Tunnel — | Island Communication —

The Monkey discovered

0

 open services on

1

 machine:

Scanned Servers			
Machine	IP Addresses	Accessible From	Services
P11	192.168.1.41		

The Monkey successfully breached

0

 machines:

--

No rows found		
Machine	IP Addresses	Exploits

The Monkey performed 9 post-breach actions on 1 machine:

	Post breach actions
	Machine
▶	P11 (192.168.1.41)

No rows found		
Username	T	Stolen From

No rows found		
Username	N	Services
